

Explanation of “first cut” and “second cut” in Cutting Guide

- Fabric is rolled out on table as shown in the diagram below.
- The first cut is made as in the diagram.

- The piece of fabric cut off with the “first cut” is then turned 90 degrees and unfolded so that it lies on the table as shown in the diagram below.
- The “second cut” is then made as shown. This “second cut” is repeated as necessary for multiple kits.
- Note: Do not include selvage in the dimension of the “second cut.”
